

Лабораторна робота №2

Результати виконання консольного застосунку ClothingStore.Console

=== ClothingStore Lab 2 Demo ===

Multithreading. Async. IEnumerable. LINQ.

1. Parallel creation of 1000 objects

Created products: 1000

2. LINQ statistics for numeric properties

Min price: 900 UAH

Max price: 1850 UAH

Average price: 1375.00 UAH

Min stock: 1

Max stock: 30

Average stock: 15.41

3. Pagination example: page 2, amount 5

Generated Polo #6	size L	Navy	1200 UAH	stock 7
-------------------	--------	------	----------	---------

Generated Polo #7	size XL	Graphite	1250 UAH	stock 8
-------------------	---------	----------	----------	---------

Generated Polo #8	size S	White	1300 UAH	stock 9
-------------------	--------	-------	----------	---------

Generated Polo #9	size M	Black	1350 UAH	stock 10
-------------------	--------	-------	----------	----------

Generated Polo #10	size L	Navy	1400 UAH	stock 11
--------------------	--------	------	----------	----------

4. Read, update and remove examples

Read product: Generated Polo #1, 950 UAH, stock 2

Updated: True; new price: 1050 UAH

Removed: True

Products after remove: 999

5. Save collection to file

Saved: True

File path: data/polos_lab2.json

6. IEnumerable example

Total price of first 10 products: 10600 UAH

7. Synchronization primitives examples

lock result counter: 1000

Semaphore result completed operations: 10

AutoResetEvent result value: 100

Demo finished successfully.
